B.Lunara IT 2-23

1. Processors – This category shows the computer's central processing unit (CPU). The CPU is responsible for executing instructions and performing calculations necessary for running applications and the operating system.

2. Network Adapters – This section includes wired and wireless network cards that enable internet and local network connectivity. They handle data transmission and communication with other networked devices.

3. Disk Drives – This category displays storage devices such as hard drives (HDDs), solid-state drives (SSDs), and external storage. These devices store the operating system, applications, and personal files.
